

❀ Features of Higo Peony ❀

What's different from other peonies?

A big center with a single layer of petals.

They can grow as large as 30cm (1 foot) in diameter.

The big petals bloom by open up like a lotus flower.

The 100-200 golden stamens puff out very far.

❀ Colors of Higo Peony ❀

White

Pink

Red

❀ How many subtypes are there?

There are 30 different cultivated varieties.

❀ History of the Higo Peony ❀

Higo Peony has the longest history among the Higo Rokka.

- 1751-1763 Originally cultivated as medicinal plants at Banjien, peonies began being grown for their beauty.
- 1795 Nakano Sukenoshin, a retainer of the Higo Domain, publishes a book about peonies under the pen name Hakucho that describes and establishes the cultivation methods of Higo Peony.
- 1826-1860 "Hanaren" groups are formed, and new flower varieties and growing methods are produced.
- 1900-1910's Cultivated varieties are narrowed down from 500 to just 100.
- 1939-1945 World War II ⇒ **Many varieties were lost**
- 1970's Various cultivators come together to form the preservation group 'Hakucho-kai' and share their expertise. The society is currently in recess.

Through the work of a few successors, the cultivation methods and varieties of Higo peony continue to be preserved.

Higo Peony

They usually bloom from
late April through early May

❀ What is necessary to make Higo Peony bloom so large?

- Long roots
- Wide sunny areas
- Transplanting every couple years
- Proper irrigation and fertilization are important

Growing Peonies in flower pots is difficult!
Flowerbed cultivation is the best way to grow healthy Higo Peony.

❀ Higo Peony were featured at The International Garden and Greenery Exposition, Osaka Japan 1990!

Their successors are currently grown and transplanted in the **Kyuhoji Ryokuchi Peony Garden** in Yao City, Osaka.

The garden will be open from Sun, April 28 to Sun, May19 in 2024.

Tsukawara Museum

Sun, April 28 - Mon, April 29

Let's look the beautiful flowers and savor their fantastic aroma!

❁ Flower Features ❁

Big center (the pistil)
Single layer of petals
Clear color

Let's see what makes each flower distinct!

❁ Carrying on the Tradition ❁

Strong traditionalists in Kumamoto known as "Higo Mokkos" have carefully preserved the methods of cultivation, formation and appreciation of potted plants, flowerbeds and bonsai.

What a profound craft!

❁ History of Higo Rokka ❁

Beginning in the 1700s, The 6th Hosokawa Lord of the Domain, **Hosokawa Shigekata (1720-1785)** encouraged samurai in Kumamoto Domain to grow to practice self-discipline.

In the 1800s, during the reign of 10th-generation Hosokawa Narimori (1804-1860), the samurai formed groups called 'Hanaren' to establish new varieties of flowers and set rules to grow them.

Taking flowers and seeds out of the group was prohibited!

In 1960, six of these special varieties of flower were selected throughout the seasons for an exhibition that would be held in presence of the Emperor.

These six types of flower have been collectively called 'Higo Rokka' ever since.
