

WELCOME TO KUMAMOTO

GLOBAL NATURE
POSITIVE
SUMMIT 2026

Hitori Hitohana
One Citizen One Flower

What Is the “One Citizen One Flower” Movement?

An initiative that encourages every citizen, business, and public organization to help grow flowers—and, in doing so, build a stronger community. By planting and caring for flowers in parks and along sidewalks, in workplaces and households, we strengthen the bonds between people and their communities, enrich everyday life, and foster a vibrant and attractive city.

Taking this Summit as an opportunity, we would like to welcome you with an arrangement of locally sourced flowers and greenery. We hope the beauty of this piece will stay with you as a lasting memory and serve as a symbol of the ideals of Nature Positive.

Artwork Concept

Inspired by the motif of a bird’s nest this arrangement symbolizes the cycle of nature and the interconnectedness of life.

It incorporates trees that were felled to help preserve the historic remains of Kumamoto Castle, as well as bamboo harvested as part of efforts to manage neglected bamboo forests. By giving these natural materials a new purpose, the work symbolizes nature’s renewal and its role in sustaining new life.
